The European Community Regulation on chemicals and their safe use (REACH)

Dear customer,

The legislation concerning Registration, Evaluation, Authorization and Restriction of Chemicals is according to the:

REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

As regards REACH Solar is considered as a distributor and supplier of goods. This demands that we pass on information concerning each product of our range of products containing substances of a quantity higher than 0.1% weight by weight listed in the European Chemicals Agency candidate list for Substances of Very High Concern.

Our products can in exceptional cases contain substances that are listed in the candidate list. To the extent that these products contain more than 0.1 weight percentage of such substances, we will inform about it to the best of our knowledge.

Solar is performing its obligations about the REACH regulation, by informing about the substances on the sales order and the invoice for products containing substances of very high concern above the threshold of 0,1% weight by weight.

The products distributed by Solar that contain substances listed in the European Chemicals Agency candidate list are registered in the European Chemicals Agency's SCIP database, thus conforming to the Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives.

For Solar to sign statements regarding REACH, please provide us with specific article numbers.

If you anyway have questions concerning Solar's work with REACH you are welcome to contact our Master data department on Compliance_MDO_DK@solar.dk

Best regards,

Thomas Clausen
Vice President, Group Sourcing & Category Management
